In the following diagram, H is the midpoint of segment AB, G is the midpoint of segment BC, F is the midpoint of segment CD, and E is the midpoint of segment DA. The segments in this diagram will be interpreted as vectors. Eg. \overrightarrow{AB} is the vector from **A** to **B**, whereas \overrightarrow{BA} is the vector from **B** to **A**.

Indicate whether the following statements are true, false, or if it can't be said either way due to a lack of information.

(i)
$$\overrightarrow{AB} + \overrightarrow{BC} + \overrightarrow{CD} + \overrightarrow{DA} = \overrightarrow{0}$$
