

PIMS-SFU UNDERGRADUATE SUMMER SCHOOL

July 7 - August 1, 2014
Simon Fraser University

Multiple Zeta Values:

Combinatorics, Number Theory and
Quantum Field Theory

The PIMS-SFU undergraduate summer school on multiple zeta values is an intensive one month program for Canadian and international students. The core of the program is a course which provides an elementary introduction to multiple zeta values and their applications. There will be exploration sessions for students to investigate these ideas through exercises and research problems.

MAIN LECTURERS:

Karen Yeats, Simon Fraser University
Matilde Lalín, University of Montreal
Mike Hoffman, U. S. Naval Academy
